

## **Pre-Anesthetic Blood Testing**

### Consent Form

Like you our greatest concern is the well-being of your pet. Before putting your pet under anesthesia, we will perform a full physical examination. However, many conditions including disorders of the liver, kidneys or blood, are not detected unless blood testing is performed. Such tests are especially important before any kind of surgery. For these reasons, we highly recommend blood screening before such procedures.

Our laboratory is fully equipped and staffed to perform these important blood tests. Results will be immediately available to examine before anesthesia and/or surgery. Please indicate your choice below

Pet's Name: \_\_\_\_\_

- Yes, I want my pet to have a pre-anesthesia blood screen
- No, I do not want my pet to have have a pre-anesthesia blood screen.

Signature of Owner/Agent : \_\_\_\_\_

Date : \_\_\_\_\_
