

Pain Management

Consent Form

- ⤴ Pain is more than an unpleasant sensation or emotion. Unrelieved pain can lead to harmful physical effects and may delay healing.
- ⤴ While pets can't tell us when and where they hurt, we know they feel pain as much as people do. Consequently, we assume any injury, disease or procedure that causes pain in people will also cause pain in your pet and should be treated.
- ⤴ We believe controlling our patients pain is important. Medication may be administered before, during and/or after your pets medical procedure to reduce pain and discomfort and to promote recovery.
